

Buffalo, New York

Buffalo State College Campus-Wide Elevator Upgrades

Owner State University Construction Fund

Completion Date 2007

Our Fee \$150,000

Services

- Architecture
- Mechanical Engineering
- Electrical Engineering
- Structural Engineering
- Asbestos Design Services

Watts provided Architecture, MEP Engineering, Structural Engineering, and Asbestos Design Services for Charles Calderone Associates to replace twelve aging elevators in nine buildings on the campus of Buffalo State College. In several of the buildings, new elevator machine rooms are being constructed in order to house new elevator machine equipment.

Power and ventilation are being provided to the new elevator machine rooms and the elevators will be tied into the building fire alarm systems. Asbestos remediation is being performed as required in order to facilitate the installation of the new elevators. This project is scheduled for completion in the fall of 2007.

Excellence in all we do.

WATTS Architecture & Engineering, P.C.
