

CANISIUS COLLEGE “OLD MAIN” QUAD SITE IMPROVEMENTS AND PARKING RENOVATION

Owner:
Canisius College

Location:
City of Buffalo, Erie County

Completion Date:
August 2002

Construction Cost:
\$1,300,000

Services:

- *Site/Civil Design*
- *Construction Phase Services*

Watts Engineers participated on the design team that provided complete civil/site engineering services for the site improvements to the “Old Main” quadrangle and parking lot renovation for the “Hughes Avenue” parking facilities on the main campus of Canisius College. Design services included site layout and design of all exterior paving, drives, parking, sidewalks, site grading and drainage improvements on the one-acre project site.

A particularly unique aspect of the project was the extensive use of precast products such as unit pavers and modular retaining wall units to construct pavements, seat walls and tree wells throughout the quad. Watts Engineers also provided engineering services during construction.
